

Engineers for a Sustainable World
2013 Great Lakes Regional Conference
Rustbelt Sustainability | Nov 1-3 | University of Pittsburgh

Call for Projects

We are interested in having college and university students present or display posters on projects they have worked on at their campuses or in their communities around the general theme of sustainability. Projects do not have to be complete, and could be in any of the following suggested topics (or others!):

- Agriculture
- Energy and water efficiency
- Infrastructure and transportation
- Renewable energy
- Building design, reuse, or monitoring
- K-12 educational initiatives

If interested in participating please send a one-page abstract less than 500 words either through www.eswpittregconf.weebly.com, or directly to mkw20@pitt.edu. The committee will review all abstracts and notify applicants within one week after submission if they have been accepted to present or not. Abstracts submitted before October 15, 2013 will be given priority in review.

For questions please contact:

Matt Weschler | Conference Chair | 2013 Regional Conference
